

HYVA telescopic and hydraulic cylinders: Higher Durability, Higher Strength

Hyva's telescopic cylinders offer unequalled quality and the lowest cost of operation in the industry. Action Hydraulics is authorized to sell and service Hyva Hydraulics. We stock genuine Hyva seal kits, telescopic cylinder and accessories.

Hyva's line of telescopic, hydraulic, front-end and tipping cylinders have been designed with industry leading low oil volumes to allow for faster tipping and the lightest cylinder weights in the industry. Globally recognized as the strongest, the most reliable and the most stable telescopic cylinders, HYVA products also boast a superior payload speed and capacity, require less periodic maintenance and offer the best value for money in today's demanding market.

As an authorized agent of Hyva, Action Hydraulics can supply any Hyva component, cylinder or accessory. We are capable of refurbishing Hyva cylinders, back to factory specifications, which is often a cost effective option over outright replacement.

We are equipped with overhead cranes and can safely remove and install hoist cylinders at our facility.

We commonly assist customers in crossing over hoist cylinders from other manufacturers to Hyva models, as it is widely acknowledged that Hyva's cylinders offer superior value. If we don't have the cylinder or accessory you desire in stock, we can usually obtain it the same day from Hyva's local G.T.A. warehouse.

Finally we can also customize Hyva cylinders to make them even more durable for harsh applications. By leveraging our own grinding and chroming facilities we can chrome each stage in your hoist cylinder for improved durability and longevity.
