

Hydraulic Hose, Fittings and Accessories, by Action Hydraulics Ltd.

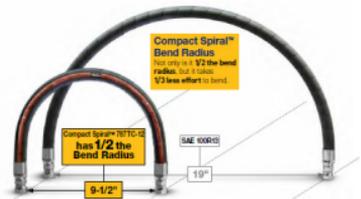

We make hoses while you wait

Our while you wait service means you get a new hose rapidly, which translates to reduced downtime for your machines. To replace your damaged hose, either provide a part number and measurements or bring in your ruined hose for accurate dimensions. You can even drive your mobile equipment into our service bay and we will remove and replace damaged hoses for you.

We endeavor to replace any hose that has been damaged or destroyed in your equipment, whether it be industrial or mobile, by proudly using quality Parker hose and fittings. We do our best to cross over from any other brand you have.

We also offer free delivery and pick-up in the GTA.

In addition to on-site services, we provide vendor managed inventory services, and can supply crimper programs and stock and manage client's inventories including providing clients regular reports to track their purchases.

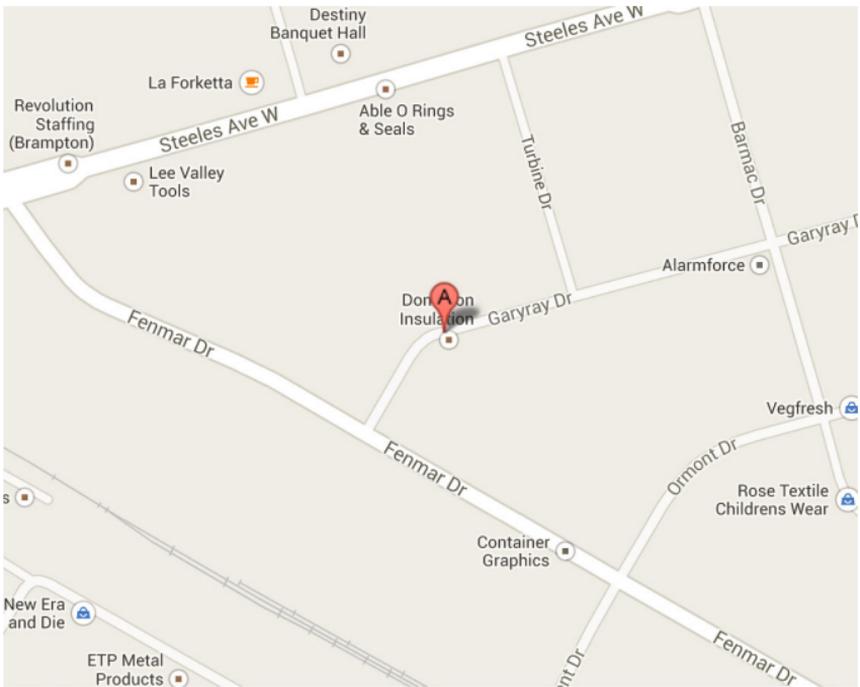

797 Garyray Drive Toronto, Ontario M9L 1R2
